OZIVA
AUXILIARY STEVEDORING SERVICES

About OZIVA

A practical partner for stevedoring, cargo handling and operational support

Founded in 2022 in Beira, Mozambique, OZIVA is an auxiliary stevedoring and cargo handling company focused on quality, safety, customer satisfaction and operational efficiency. We support clients with practical, adaptable teams for demanding cargo operations across port, terminal and warehouse environments.

Our approach is built around understanding each client's requirements and organizing the right people, procedures and operational support for the work at hand. OZIVA's teams operate around the clock in two shifts, ensuring continuity of service and operational support.

Our focus: dependable operational support, careful cargo handling, and disciplined execution.

Mission

Provide quality stevedoring services with a focus on customer satisfaction, efficiency and safety.

Vision

Grow as a leading provider of stevedoring and integrated operational solutions, recognized for efficiency and sustainable business practices.

Values

Customer focus, teamwork, respect, integrity and professionalism.

Approach

Tailored services, operational supervision and continuous learning and development.

OZIVA
AUXILIARY STEVEDORING SERVICES

Our Story & Approach

From a dedicated team to a growing operational partner

2022	**Foundation**	OZIVA begins operations in Beira with a clear focus on service quality and operational efficiency.
2023	**Expanding Operations**	The company develops its client base and strengthens its practical experience in cargo handling.
2024	**Diversifying Services**	Capabilities expand across general cargo, ore handling, tallying and cleaning support.
2025	**Strengthening Capabilities**	OZIVA continues developing its people, operational processes and client relationships.
2026	**Building for the Future**	The focus remains on reliable service delivery, continuous improvement and sustainable growth.

How We Work

A simple operating philosophy

- Understand the client's operational requirements before mobilizing resources.
- Assign teams according to the nature, volume and handling requirements of the cargo.
- Maintain clear communication and supervision throughout operations.
- Prioritize safe work practices, cargo integrity and orderly execution.
- Review operational performance and identify practical opportunities for improvement.

OZIVA
AUXILIARY STEVEDORING SERVICES

Our Services

Core operational solutions designed around cargo handling requirements

General Cargo Handling

Loading and unloading, bulk cargo bagging, pile removal, containerization, palletization, verification and counting.

Cleaning Services

Warehouse and cargo-area cleaning, including post-handling cleaning and decontamination support where required.

Ore Handling

Support for the handling and movement of mineral cargo in bulk or large bags, with operational monitoring.

Cargo Tallying

Physical counting, verification, condition checks, seal verification and operational records.

Services can be adapted to daily, weekly, monthly or project-specific operational requirements.

OZIVA
AUXILIARY STEVEDORING SERVICES

General Cargo Handling

Careful handling from receipt through movement and dispatch

OZIVA provides general cargo handling services for a wide range of goods, including different types, sizes, packaging and quantities. Our team supports the handling and movement of various products, such as fertilizers, cement, consumer goods, packaged materials, agricultural commodities and other general cargo, adapting our approach to the specific requirements of each operation.

With our experienced operational teams, OZIVA can support the handling of diverse cargo types, with a focus on safe handling, efficiency and meeting each client's operational needs.

Included Activities

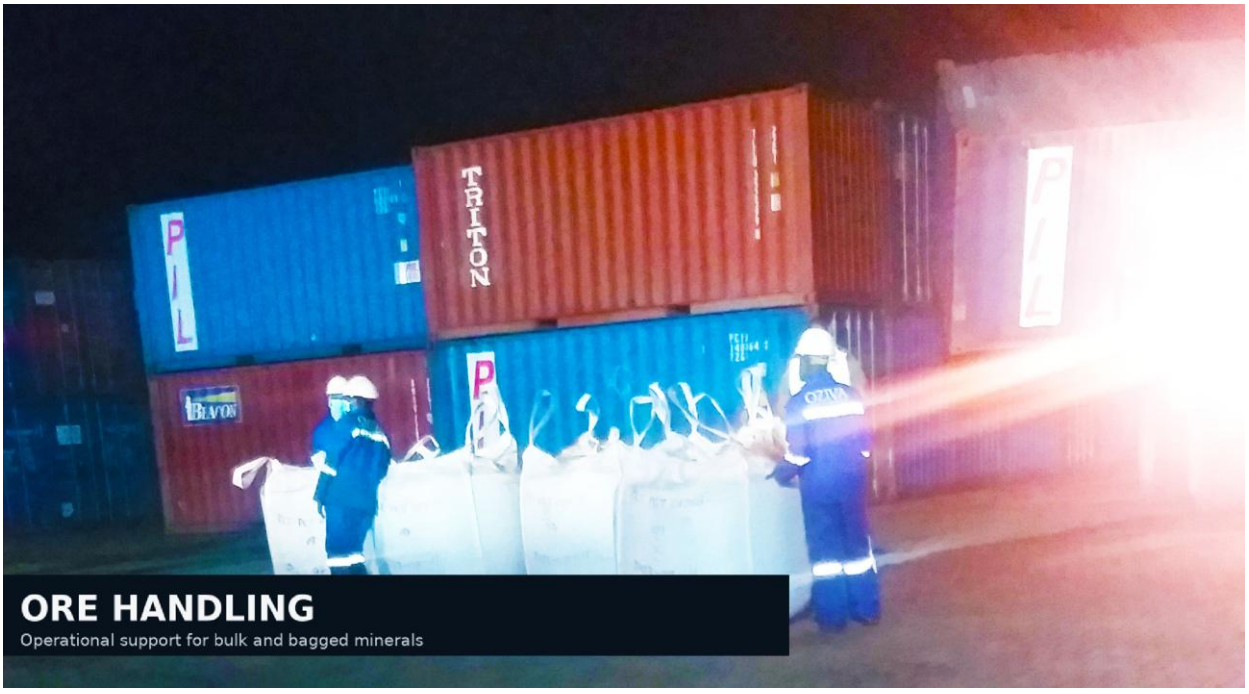

- Bulk cargo bagging into 25 kg, 50 kg, 80 kg or 1,000 kg bags, according to client requirements.
- Loading and unloading of cargo to and from vessels, trucks and designated warehouse areas.
- Pile removal and cargo rearrangement to improve access and operational organization.
- Containerization and preparation of goods for container loading.
- Palletization and securing of goods for safer movement.
- Physical verification and counting to support accurate cargo control.

Operational priority: protect cargo integrity while maintaining safe, organized and efficient handling.

Ore Handling

Operational support for mineral cargo in bulk and large-bag formats

OZIVA supports the handling of mineral cargo such as iron, lithium and chromium, including cargo arriving from regional inland markets. Our teams support weighing, bag handling, bulk handling, re-bagging where required, internal movement and container preparation, according to the client's operating process.

Typical Operational Activities

- Support during receiving and unloading operations.
- Assistance around weighing and quantity verification.
- Handling of 1,000 kg–1,500 kg bags or bulk mineral cargo, according to the operation.
- Internal movement within client-designated operational or storage areas.
- Re-bagging or preparation for containerization when required.
- Operational monitoring and coordination with workers and equipment.

OZIVA provides operational handling support; storage facilities are not presented as a standalone OZIVA service.

Cargo Tallying Services

Accurate counting and verification for better operational control

Cargo tallying is the systematic counting, checking and recording of goods during loading, unloading, receiving and dispatch operations. It supports accurate cargo control and helps identify discrepancies, visible damage or documentation issues during operations.

What We Monitor

- Physical cargo counting and quantity verification.
- Visual checks of cargo condition during handling.
- Identification of visible damage or irregularities.
- Container and cargo-unit checks.
- Seal verification where applicable.
- Operational records and communication of relevant observations.

Better tallying supports better visibility, accountability and control throughout cargo operations.

Cleaning Services

Maintaining orderly and safe cargo-handling environments

Cleaning is an important part of cargo operations, particularly where residues, dust or product traces may remain after handling. OZIVA provides cleaning support for warehouses and cargo-handling areas to help maintain organized, hygienic and operationally ready environments.

Included Services

- Warehouse cleaning and removal of dust, dirt and cargo residues.
- Cleaning of operational areas after cargo handling.
- Cleaning around pallets, equipment and work zones.
- Post-cargo cleaning where residues require additional attention.
- Decontamination support for areas affected by hazardous cargo or spills, according to client procedures.

Clean working areas support safer operations, cargo care and better workplace organization.

OZIVA
AUXILIARY STEVEDORING SERVICES

Operational Capabilities

Flexible manpower and practical support for cargo operations.

Loading & Unloading

Organized manpower for vessel, truck and warehouse cargo movement.

Bulk Cargo Bagging

Bagging operations in formats and weights requested by the client.

Containerization

Preparation and arrangement of cargo for container loading.

Palletization

Grouping and securing goods on pallets for efficient movement.

Cargo Rearrangement

Pile removal and repositioning to improve access and workflow.

Tallying & Verification

Counting and checking cargo quantities and visible condition.

Warehouse Cleaning

Routine and post-handling cleaning support for cargo areas.

Operational Supervision

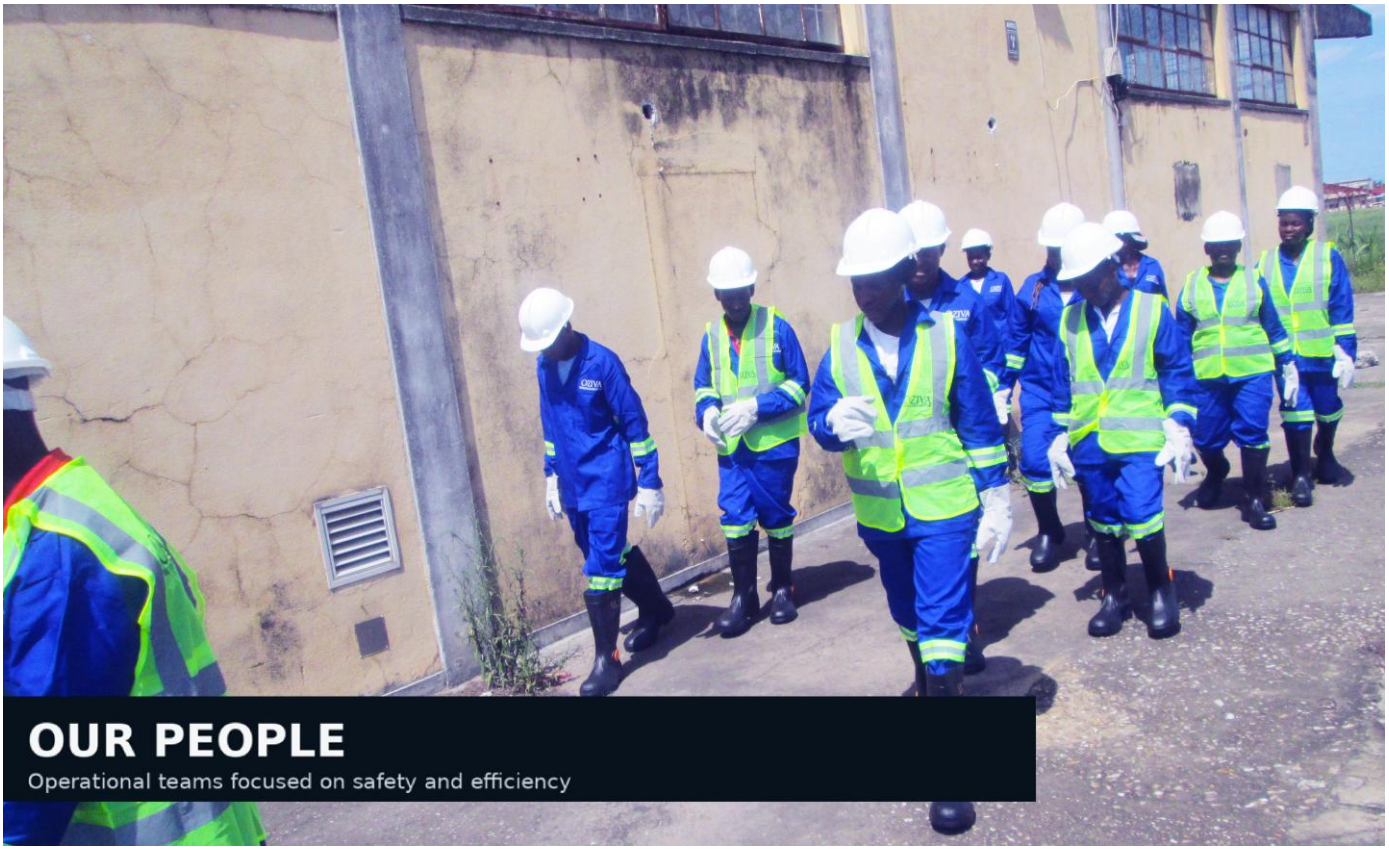

Team coordination and monitoring during assigned activities.

Flexible Service Model

OZIVA can structure operational support around recurring or project-based requirements. The company's service approach is designed to adapt manpower and activities to the agreed scope of work.

Our People

The strength of OZIVA is the team behind every operation

Cargo handling is ultimately a people-driven activity. OZIVA places emphasis on teamwork, discipline, responsibility and continuous learning. Our operational personnel work within defined responsibilities and coordinated teams to support safe and efficient execution.

- Operational teams organized according to the task and client requirement.
- Supervisory attention throughout assigned activities.
- Focus on PPE, safe working practices and site rules.
- Team communication and coordination across operational shifts.
- Commitment to learning, improvement and professional conduct.

Professional people. Clear responsibilities. Consistent execution.

OZIVA
AUXILIARY STEVEDORING SERVICES

Safety & Quality

Responsible operations are built on preparation, supervision and continuous attention.

Preparation

Understand the cargo, task, work area and operational requirements before starting.

Risk Awareness

Identify practical hazards and apply appropriate controls for the activity.

PPE & Procedures

Use appropriate protective equipment and follow applicable site procedures.

Supervision

Monitor execution and communicate issues promptly.

Cargo Protection

Handle goods carefully to reduce damage, loss and avoidable discrepancies.

Continuous Improvement

Use operational feedback to strengthen methods and team performance.

At OZIVA, we are committed to working safely, keeping our clients satisfied, and continually improving the way we work. Our teams focus on efficiency and follow appropriate safety procedures and training to ensure cargo-handling activities are carried out responsibly and effectively.

Industries & Cargo Types

Experience across varied cargo requirements

General Cargo

Packaged goods, consumer products and other general merchandise.

Cement

Loading, unloading and related operational support.

Ceramic Materials

Careful handling of ceramic products and related materials.

Bulk Cargo

Bagging, movement and preparation of bulk products.

Fertilizers

Handling support for bagged and bulk fertilizer cargo.

Ores

Mineral cargo including iron, lithium, chromium and other ores.

Hazardous / Dangerous Goods

Cargo requiring additional safety awareness and controlled handling.

Other Cargo

Operational support tailored to specific client requirements.

Each operation is assessed according to cargo characteristics, site conditions and the agreed scope of work.

Clients & Partnerships

Building relationships through dependable operational support

OZIVA works with companies in the logistics and cargo-handling sectors, providing support for a variety of cargo types, including general cargo, fertilizers, cement, dangerous goods and ores.

Our Commitment

What clients can expect from an OZIVA operation

SAFETY • RELIABILITY • EFFICIENCY • PROFESSIONALISM • TEAMWORK

Reliable Support

We focus on showing up prepared, organized and ready to execute the agreed scope.

Client Focus

We adapt our operational approach to the specific requirements of each client and site.

Operational Discipline

Clear responsibilities and supervision help keep work organized.

Cargo Care

We treat cargo integrity and accurate handling as essential operational priorities.

Continuous Learning

We encourage learning and improvement across our teams.

Sustainable Growth

We aim to grow responsibly while maintaining service quality and operational efficiency.

Our goal is straightforward: to be a dependable operational partner that clients can trust with the practical work behind successful cargo movement.
